DETAILED ACTION

1. The Examiner's previous Office Action indicated application was in condition for allowance except for double patenting rejection is now vacated. Upon review the application the examiner discovered that the Spangler et al (6,237,350) that is commonly owned with the present application was published more than one year prior to the filling date of the present application thereby qualifying as prior art under 35 U.S.C. 102(b) even though they are commonly owned. Therefore, the Terminal Disclaimer cannot overcome a 35 U.S.C. 102(b) rejection (see below and copending application 10/317,353 paper dated 6/2/06)).

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Spangler et al (6,327,350 hereinafter Spangler).

Regarding claims 1, 17 and 28. Spangler teaches a method, system and program for dynamic rules-based peg counting, comprising; at a plurality of signaling message site collectors, generating peg counter instances by comparing monitored signaling messages received by the site collectors to existing peg counter definitions, each peg counter instance including an accumulator value indicating a number of the signaling messages that match one of the existing peg counter definitions and an identifier for identifying the associated peg counter definition; receiving new peg counter definitions; and in response to receiving the new peg counter definitions, switching to

the new peg counter definitions on the fly and generating peg counter instances based on the new peg counter definitions (see col. 4 line 36 – col. 11 line 38).

Regarding claims 2-16, 18-27 and 29-40. Spangler clearly disclosed directly or indirectly and/or obvious over the claimed features.
